(718)871-3021

Summary

Staff-level Full Stack Engineer with 14+ years of experience building scalable distributed systems across fintech, logistics, telecom, and supply chain domains. Strong full-stack expertise in modern JavaScript ecosystems (MERN/MEVN), delivering end-to-end applications, backend systems, and cloud-native platforms with a focus on scalability, performance, and reliability. Recently focused on Generative AI and RAG-based systems (vector search, LLM integrations) for enterprise solutions.

Skills

Language:	JavaScript/TypeScript, Java, Python, C#
Frontend:	React, Angular, Next.js, Redux(Toolkit, Saga), HTML5/CSS3/SASS, Responsive UI development
Backend:	Node.js, Express, NestJS, Sprint Boot, ASP.NET/.NET Core, Django/Flask, RESTful APIs/SOAP services, Microservices
Database:	SQL Server, Oracle, Postgre SQL, MongoDB, Cassandra, Query Optimization&data modeling
DevOps/Cloud:	AWS(Lambda, EC2, S3, SQS, SNS), Azure(App Services, Functions, Kubernetes), CI/CD(GitHub Actions, Jenkins, CircleCI), Docker/containerized deployments, Agile/Scrum workflows
AI/NLP:	Generative AI integration, RAG(Retrieval-Augmented Generation) systems, Vector databases(FAISS, Pinecone,Weaviate), LLM API integration(OpenAi-based systems)

Experience

KGS Technology Group Inc

Senior Software Engineer • Atlanta, GA

01/2025 - Present

- Developed scalable backend APIs using Python and Flask to support React - based enterprise applications.
- .Built an internal GenAI assistant using Retrieval -Augmented Generation(RAG), embeddings , and vector search for company knowledge management.
- Integrated third-party APIs and developed automated unit tests for backend services.
- Assisted with CI/CD implementation using GitHub Actions and modern DevOps workflows.
- Participated in Agile sprint planning, peer code reviews, and collaborative software development practices.
- Improved internal documentation access and self-service support through AI-powered solutions.

Manhattan Associates

Senior Software Engineer • Atlanta, GA

05/2019 - 01/2025

- Developed enterprise warehouse management and supply chain software applications using Angular, React , Java , and Spring Boot.
- Migrated and modernized Angular applications across multiple framework versions including Angular 2 through Angular 8.
- Designed reusable UI components , directives , decorators , and services for enterprise-scale applications.
- Built RESTful APIs and Node.js services supporting warehouse management workflows Developed and maintained automated test suites using Selenium , Cucumber , Jasmine , Karma, and JUnit.
- Created CI/CD pipelines and Jenkins jobs for AWS deployment environments.
- Worked with Java/J2EE , Spring Framework , Hibernate , and SQL for backend enterprise services.
- Improved application performance through component optimization and frontend architecture enhancements.
- Collaborated in Agile teams using JIRA and Confluence for sprint planning and technical documentation.
- Developed scalable frontend interfaces using Angular, React , Bootstrap , SASS, and LESS.

Elavon

Senior Software Engineer • Atlanta, GA

04/2017 - 03/2019

- Developed enterprise fintech and payment processing applications using Angular, React, and Node.js.
- Built responsive single-page applications (SPA) using Angular 4, Bootstrap, HTML5, CSS3, and JavaScript ES6.
- Developed reusable React components and integrated Redux for state management.
- Implemented RESTful APIs, AJAX integrations, and third-party web service integrations.
- Built backend services using Node.js and Express.js.
- Developed cross-browser compatible UI applications and optimized frontend performance.
- Participated in full SDLC, including requirements gathering, development, testing, deployment, and production support.
- Collaborated with product managers and stakeholders in Agile development environments.
- Used Git, Gulp, and CI/CD workflows to streamline deployment and development processes.

Norfolk Southern

Application Developer • Atlanta, GA

12/2015 - 04/2017

- Developed a highly multithreaded concurrent messaging platform using TCP sockets and distributed services.
- Built broker -based communication systems for remote cluster monitoring and process management
- Developed Java backend components and persistence layers using Hibernate and Oracle.
- Implemented centralized log management solutions integrated with Splunk.
- Built distributed messaging and service discovery solutions using JMS and Kafka.
- Performed JVM, garbage collection, and web service performance tuning.
- Assisted with Cassandra cluster configuration for high-volume log aggregation systems.
- Developed monitoring dashboards and UI components using JavaScript and jQuery.

AT&T

Software Developer • Alpharetta, GA

08/2013 - 11/2015

- Developed enterprise real estate management applications using ASP.NET MVC Web API and SQL Server.
- Designed and optimized backend services and database schemas for improved performance.
- Built scalable web APIs and integrated frontend components using ExtJS.
- Collaborated with cross-functional teams on enterprise software modernization initiatives.

Snapfinger

Junior Developer • Atlanta, GA

02/2013 - 05/2013

- Developed an HR management platform for Walgreens using WCF and Silverlight.
- Built and optimized SQL Server queries and stored procedures.
- Assisted with cloud deployment and configuration on Microsoft Azure.
- Worked with Entity Framework for database access and object mapping.

Parkmobile

Junior Developer • Vinings, GA

02/2011 - 12/2012

- Built RESTful web services for mobile applications and enhanced online ordering systems using ASP.NET MVC and C#.
- Developed backend integrations using WCF and MSMQ for asynchronous communication.
- Worked with JSON APIs and JavaScript -based frontend functionality.
- Collaborated with senior developers to improve application stability and performance.

Education

University of Georgia

Computer Science • Athens, GA

05/2011

I have a Bachelor's degree in Computer Science.
